Message Banking, Voice Banking and Legacy Messages

DEFINITIONS:

Voice Banking is a process of recording a large inventory of your speech that is then used to create a synthetic voice that approximates your natural voice.

Done successfully, this would allow one to spell and create unique messages and then speak them through a synthesizer that approximates one's natural speech. There are now several options (both free and fee based) to create a voice.

Message Banking with your own

voice *digitally record and store words, phrases, sentences, personally meaningful sounds and/or stories using your natural voice, inflection and intonation.*

These messages are catalogued as .wav files and may then be linked to messages in a variety of augmentative communication technologies or sound storage files. This will allow you to 'retrieve' a message and speak it in your own voice but does not allow you to create novel messages by spelling. If you have recorded individual words, you may combine those words to create unique messages, although the output will sound more staccato than your natural speaking.

Message Banking by proxy is the election of a proxy voice to do all recordings because issues of fatigue, pain or intelligibility may make it difficult for an individual to bank all messages. In this case, the patient may still bank '*legacy messages*' but the majority will be banked by proxy.

TERMINOLOGY:

Legacy Messages are those messages, often delivered with unique intonation and prosody that are unique or particular to you. It may be a 'trademark' message you say or it may be a trademark *delivery* of a message that many people say. A legacy message does not need to be meaningful to the general population instead it may have unique and personal meaning to only you and a loved one. Further, a legacy message does not need to be real words to be meaningful. It may be the way you clear your throat in a sarcastic manner to communicate "*I told you so*" or it might be the invented pet name you have for a loved one delivered with your unique voice, intonation and prosody. Similarly, legacy message may be that stereotypical thing you say after your favorite sports team scores or it may be a unique greeting you deliver to friends. Those close to you may be helpful with identifying these *Legacy Messages* because sometimes they are so naturally part of socially relating with others, you may not even be aware you are 'known' for them.

Context or 'Relationship' Vocabulary:

are those words, phrases and full messages one uses to effectively participate in an interaction is a specific context such as 'how to help me transition to my wheelchair' or 'talking with my board of directors' or

Boston Children's Hospital

Until every child is well™

‘discussing my status with my therapist’. It is the predictable *script* in an interaction or a relationship.

THE VOCABULARY:

The following vocabulary was message banked by people with ALS. People graciously permitted us to share their messages and we attempted to organize vocabulary by categories for ease of reference. *This list is NOT intended to be a script from which others record.* It is intended to give people *ideas* of messages that others thought were important.

Self Determination

Accept my decision
 All I am trying to say is
 Change the subject, please
 Do it
 Don't do that again

Boston Children's Hospital

Until every child is well™

Explain that to me
 Get the hell away from me
 Give me that, please
 How will I ...
 I am doing it
 I can handle it
 I can't move but I am alive
 I don't want that
 I don't want that treatment
 I gave my final word
 I have something to say about that
 I have the choice
 I know, I don't need to be reminded
 I really feel I can do it
 I refuse that treatment
 I think it's long enough
 I want to do it
 I want to know what it is
 I want to talk about...
 I won't guarantee anything
 I would have to question that idea
 I would really like to discuss that further
 If I could, I would
 I'll deal with it
 I'll let you know
 I'm as crazy as I was before
 I'm as sane as I was before
 I'm doing the impossible
 I'm doing well
 I'm finished
 I'm not a child
 I'm not contagious
 I'm not going to take it
 I'm still here you sons of bitches
 I'm too rushed
 It feels great to ...
 It is important to me
 It suddenly becomes important

Boston Children's Hospital

Until every child is well™

It's absolutely ridiculous
 It's my choice
 It's my decision to make
 It's up to me
 I've had it
 Just tell the truth
 Look out world, here I come
 No I won't
 No I'm not
 Please don't interrupt
 Please don't touch me
 Please get out of here
 Please keep in mind I am a human being
 Please keep in mind I am a person
 Please keep in mind I was very healthy just a short time ago
 Please let me finish, don't anticipate
 Please remove that
 Please stop
 Please stop nagging
 Please wait until I finish what I am trying to say
 Should I be concerned?
 Take that away
 Take that away from me
 That is not fair
 That makes me mad
 That's my problem
 That's all I have to say
 That's my choice
 That's my problem
 That's not the way it works
 That's too much for me
 That's what I like
 That's what I said
 That's why I feel the way I do
 We have to stop
 What are my choices?
 What can I do?
 What is next?

Boston Children's Hospital

Until every child is well™

Yes, I can do that
 You bet your britches
 You can come up with something better
 You could not possibly understand
