

Please welcome Amaliya Silsby, CCC - SLP!!!!  
Amaliya will be providing clinical services full time  
in our newly formed  
**ALS Augmentative Communication Program**

I have been working with the adult neurogenic population for 10 years. A significant part of my career has been devoted to AAC; I thoroughly enjoy the challenges inherent in identifying and modifying tools to support communication in individuals who struggle to participate in everyday interactions. I have learned the value of a multifaceted, multidisciplinary approach to AAC and am excited to be part of the ACP team at Boston Children's Hospital! I look forward to collaborating with my AAC and AT colleagues to provide a comprehensive evaluation and treatment program to individuals with ALS.

Outside work, I enjoy many exciting and unpredictable moments with my energetic 2-year-old twins. I find cooking fun and relaxing and am eager to return to the soccer field!
